

Spalding Cove (and Fishermans Point)

Indicative Anchoring Position

34° 46.0'S 135° 58.5'E

Shelter from E – S – W

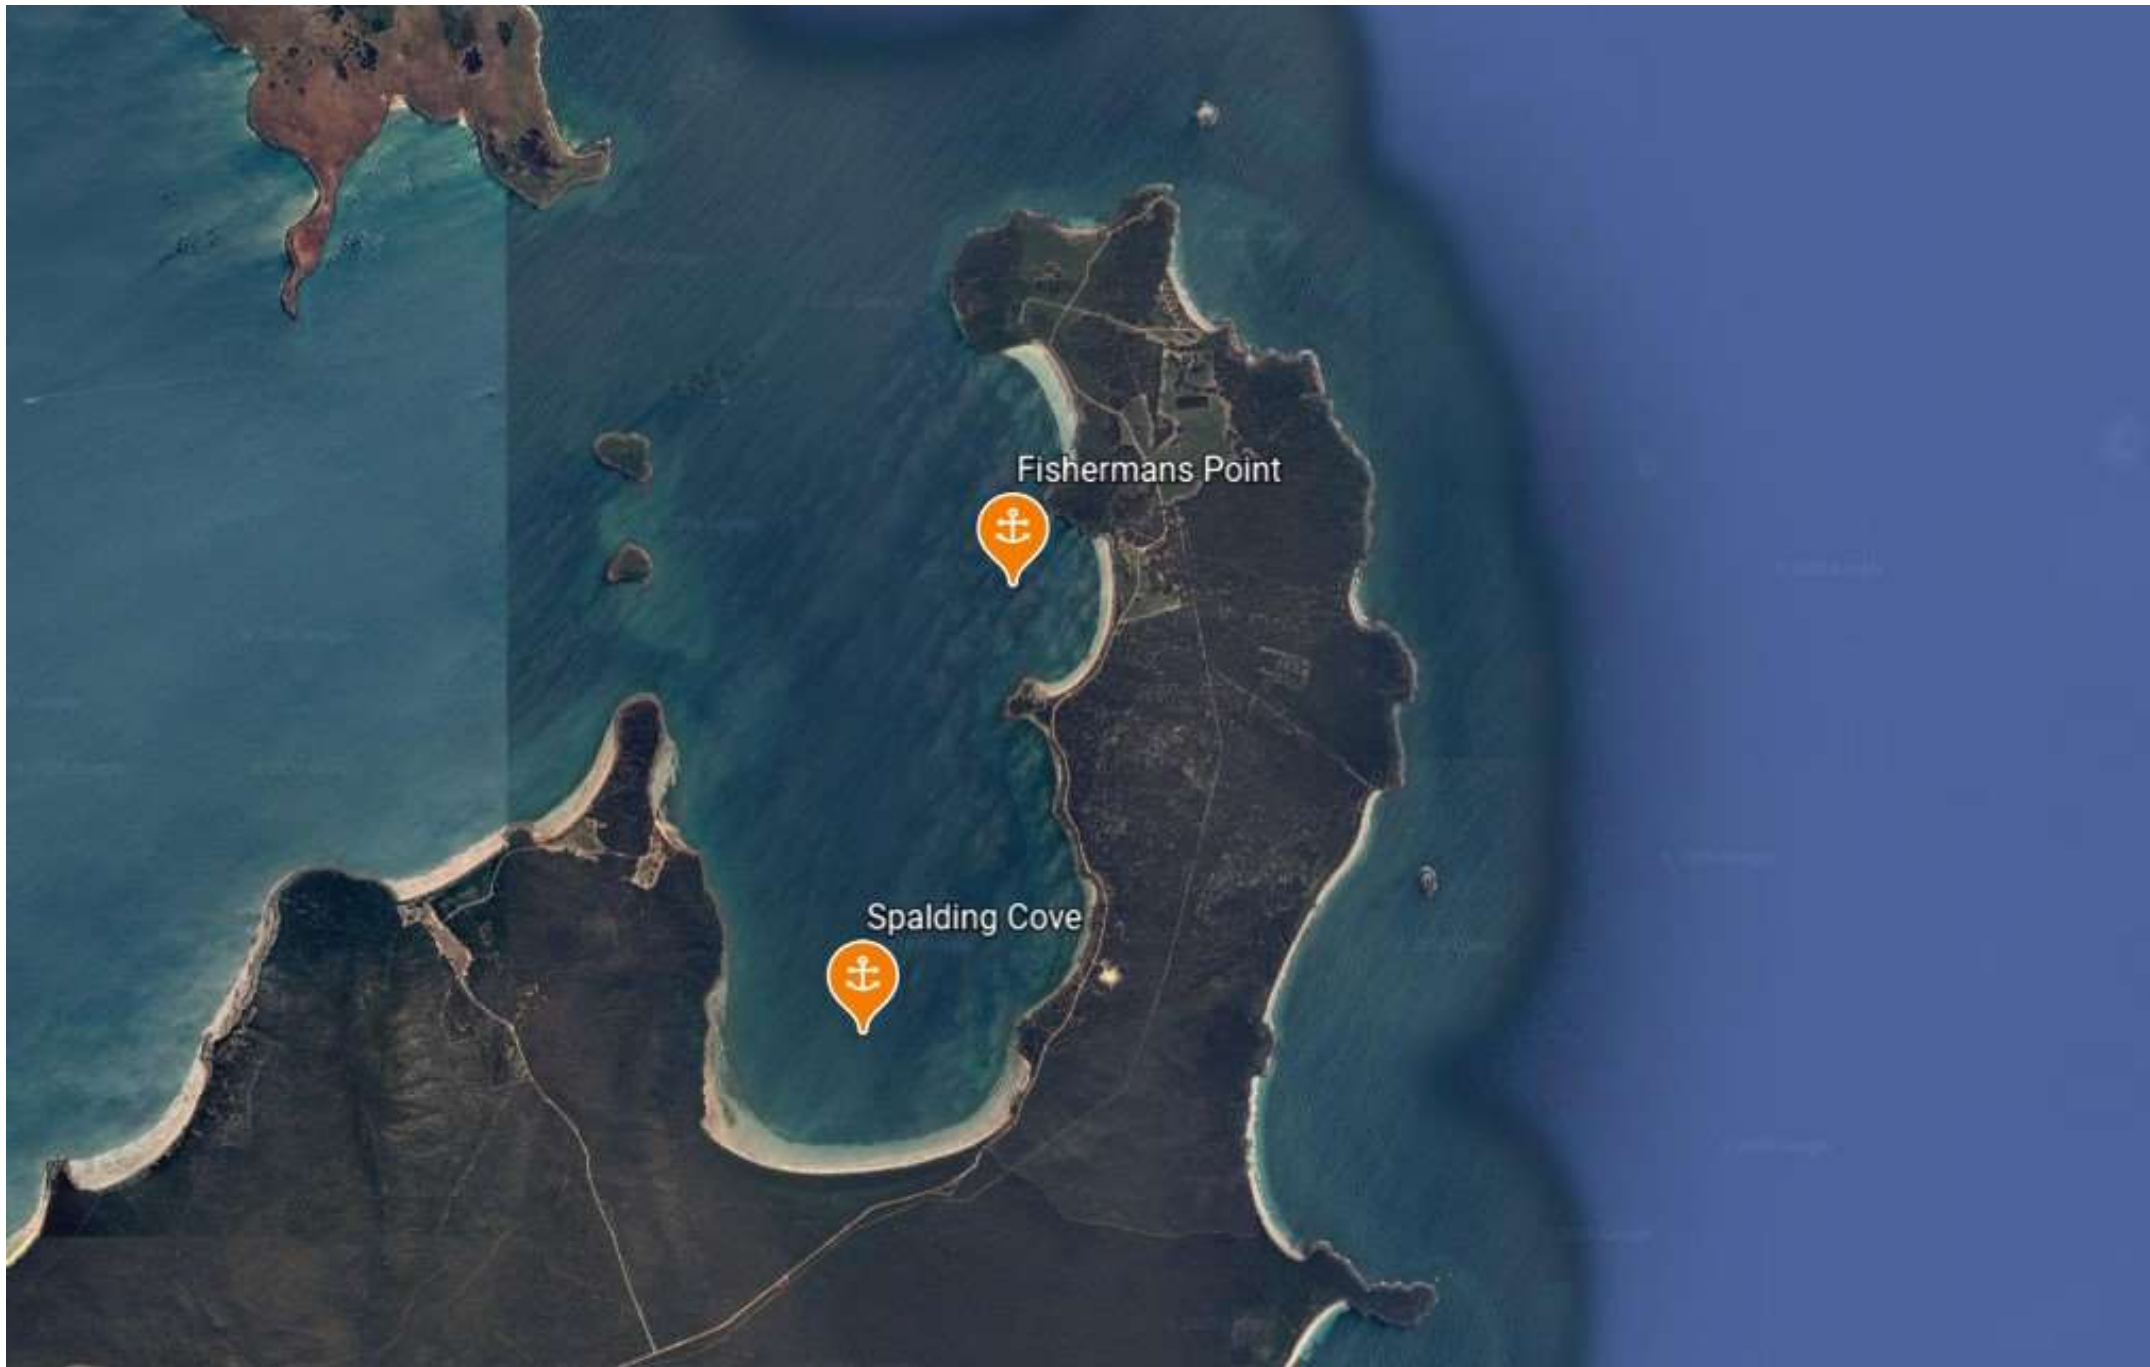

Note. Indicative anchoring positions are for reference only and should not be used as waypoints. The best position for anchoring depends on many factors including vessel draft, tide, and forecast wind.

Spalding Cove is a large and open bay which provides excellent shelter in any wind other than northerlies, and a wide choice of anchorage locations.

The two locations shown here have no special significance, and almost anywhere around the rim of the cove can be used. Beach access is good, and rambling beach walks are possible.
